

GOVERNANCE

Governance: The Business of Being a Co-op Board

Good Governance is the cornerstone of a successful co-op and a strong tenet of the 20/20 co-op standards. When we don't get governance right, we put everything at risk. But what does governance mean? How can Boards of Directors provide strategic and principled leadership in their co-op?

In this workshop, we won't talk about the day-to-day work of being a board member. Instead, we'll learn about the personal rewards and value of providing principled leadership, what governance is and how to get it right.

This workshop covers the following:

- governance vs. management in your co-op
- the good governance test
- creating organizational structures that work
- addressing the barriers to good governance
- electing good directors
- succeeding as a director and board member
- effective members' meetings
- the role of the chair
- diversity, inclusion, harassment and bullying in the co-op setting
